Claim Rejections - 35 USC § 102

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2-5 stands rejected, as best understood, under 35 U.S.C. 102(b) as being anticipated by US Patent #2,490,923 to SASGEN. Regarding claim 5, SASGEN discloses the use of a clamp including a first L-shaped clamp arm (48) having an outer shoulder (48A) and a first joint leg (unlabeled) disposed at 90 degrees; a second L-shaped clamp arm (60A) having a second joint leg (unlabeled) disposed at 90 degrees; and third/fourth legs (61, L) rotatably joined to the first and second arms to press a frame (67,65) therebetween. In reference to claim 2, the arms (48,60) are riveted as at (51) to rotate and are riveted as at (51) to rotate with the clamp lever (61). Regarding claim 3, the clamp body extends at a "substantially" straight manner when opening. In reference to claim 4, the L-shaped arms (48,60) have a raised surface (62) at the opening and curve outwardly as at.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
